PROFESSIONAL SUMMARY

Java Backend Developer with 1+ year of experience building scalable Spring Boot applications, RESTful APIs, and full-stack web solutions. Strong expertise in Core Java, Spring Boot, Spring Security, Hibernate/JPA, MySQL, Docker, Git, and cloud deployment. Experienced in backend architecture, API integration, authentication systems, debugging, performance optimization, Agile development, and scalable application design.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, HTML, CSS

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, React, Next.js

Backend: REST APIs, Microservices, JWT Authentication, OAuth2, API Integration, OOP, MVC, JUnit

Database: MySQL, JDBC, SQL Queries, Data Modeling

Tools & DevOps: Docker, Git, Maven, Postman, CI/CD, MySQL Workbench, VS Code, Google Cloud

Concepts: Data Structures, Debugging, Performance Optimization, Agile, Scrum, Code Review

WORK EXPERIENCE

Tata Consultancy Services (TCS) | Analyst – Java Developer | Feb 2025 – Present

- Built 5+ backend modules using Core Java and Spring Boot for enterprise applications.
- Reduced feature delivery time by ~20% through reusable service components in Agile sprint cycles.
- Designed and integrated RESTful APIs for multiple business workflows and data-processing services.
- Implemented CRUD operations using Spring Data JPA and Hibernate with optimized MySQL queries.
- Reduced manual data handling effort by ~30% and validated APIs using Postman.
- Resolved 40+ production defects improving application stability and backend performance.
- Supported data persistence for 10,000+ records with reduced API response latency.
- Collaborated with cross-functional teams following Agile/Scrum methodologies.

PROJECTS

Career Agent AI – AI Powered Career Platform [Live](#) | [GitHub](#)

- Developed scalable Spring Boot backend architecture with JWT and OAuth2 authentication.
- Built AI-powered resume scoring engine generating candidate scores from 0–100%.
- Integrated Groq LLaMA chatbot for AI-based career assistance and recommendation workflows.
- Implemented RESTful APIs for authentication, resume analysis, profile management, and job services.
- Integrated external JSearch APIs for real-time job recommendation functionality.
- Optimized backend processing flow improving API response handling and scalability.
- Containerized application using Docker and deployed with cloud-hosted MySQL infrastructure.
- Implemented role-based authorization, exception handling, and secure authentication mechanisms.

AI Job Application Assistant [Live](#) | [GitHub](#)

- Developed AI-driven automation platform for resume generation, cover letters, and recruiter outreach emails.
- Built structured Excel-to-AI workflow pipeline for processing multiple job applications.
- Integrated LLM-based content generation for personalized resumes and recruiter communication.
- Implemented bulk and single email automation workflows improving outreach scalability.
- Designed backend APIs using Next.js for workflow orchestration and structured data processing.
- Reduced repetitive manual application effort through automated processing workflows.
- Handled structured datasets and optimized processing logic for multiple input scenarios.
- Built reusable frontend and backend modules improving maintainability and scalability.

EDUCATION

B.Sc. Computer Science – Rathinam College of Arts and Science

CGPA: 7.0.

CERTIFICATIONS

Core Java – Udemy

Java JSE Certification

TCS iON NQT
